Our friends at Sketchfab have noticed a recurring trend: among the many 3D scans shared on their platform, a significant number are of historical doorways. Often neglected in today's designs, doors...

Domestic Architecture and the Use of Space investigates the relationship between the built environment and the organisation of space. The contributors are classical and prehistoric archaeologists, anthropologists and architects, who from their different backgrounds are able to provide some important and original insights into this relationship.

Architecture has attracted increasing worldwide attention in recent years, not only because of its cultural significance but also because of concern over the performance and resource implications of buildings. 101 in-depth articles by international scholars and practitioners bring the subject into focus by examining issues from various viewpoints. Please contact your representative for a leaflet detailing full contents and contributors. It also includes sample pages and several illustrations from the book.

Key Modern Architects provides an accessible and thought-provoking introduction to the work of the most significant architects of the modern era. Fifty short chapters introduce fifty key architects, from Le Corbusier to Aldo Van Eyck to Zaha Hadid, exploring their most influential buildings and developing a critique of each architect's work within a broader cultural and historical context. The selection represents the most influential architects working from 1890 to the present, those most likely to be taught on survey courses in modern architectural history, along with some lesser-known names with an equal claim to influence. Emphasis is placed on a critical and interpretative approach, allowing the student to position each architect in a cultural and intellectual context quickly and easily. Artistic, technical, social, and intellectual developments are brought to the fore – built and unbuilt projects, writings and influences. This approach brings to light the ideology behind architectural work, offering insights into each architect's working practice. - Helps students to develop a critical approach to understanding modern architectural history. - One chapter per architect – meaning chapters may be read individually as a concise resource for the study of an architect, or together as a coherent book-length history of the whole period of modern architecture. - Chapters are supported by boxed lists of each architect's most significant projects, along with suggestions for further reading as a springboard to further study and research. Combining the clarity and accessibility of a textbook with in-depth reading and a critical approach, Key Modern Architects provides an invaluable resource for both the classroom and for independent study in architectural and art history.

Distinctive architecture reflecting lifestyles from around the world. Many designs by famous architects. Reflects traditional and contemporary design. Stunning photographic images.

The Art of Aubrey Beardsley is a study about English artist and illustrator Aubrey Beardsley, written by British editor and critic Arthur Symons. The book includes biographical essay and numerous illustrations by the artist. Beardsley's drawings in black ink, influenced by the style of Japanese woodcuts, emphasized the grotesque, the decadent, and the erotic. He was a leading figure in the aesthetic movement which also included Oscar Wilde and James McNeill Whistler.

This book explores households, social organization, and rituals in Viking Age Scandinavia through a study of dwellings and their doorways.

This is a collection of essays focusing on conventions of change in the arts, philosophy, and literature.

Architectural heritage is now recognised to be of great importance to the historical identity. In order to take care of the architectural heritage of a region, town or nation, now recognised as of great importance to their historical identity, we need to share experiences and knowledge regarding heritage preservation in many parts of the world.Covering advances in this field presented at the thirteenth in a series of now-biennial conferences that began in 1989, this book covers such topics as Heritage architecture and historical aspects; Learning from the past; Surveying and monitoring; Performance and maintenance; Structural restoration of metallic structures; Preservation and monitoring; Earth construction; Modern (19th/20th century) heritage; Maritime heritage; Heritage masonry buildings; Stone masonry walls; Wooden structures; Simulation and modelling; Material characterization; New technologies or materials; Corrosion and material Decay; Seismic vulnerability; Non-destructive techniques; Assessment and re-use of heritage buildings; Heritage and tourism; Social and economic aspects in heritage; Guidelines, codes and regulations for heritage.
