OSCEs in preparation for these exams, but also for American and Indian exams, and any other exams within the field of intensive care medicine. The OSCE is a style of examination that requires the candidate to present specific information in a short space of time matched to a prescriptive mark scheme. This book allows candidates preparing for an ICM OSCE to format their knowledge for this type of examination whilst practising and rehearsing against time. The 60 OSCE stations provide a broad array of topics from past exams ranging across the training ICM curriculums. The mark schemes are presented in a short, punctuated form allowing the candidate access to important points, ideal at the sharp end of an exam campaign. The 5 sets of OSCE exams are designed to run as a set of 12. Each set will have an array of clinical scenarios requiring swift assessment, diagnosis, recommendations for investigations and management, whilst also exploring aspects of pathophysiology. There are a number of data-interpretation tools that are incorporated into clinical scenarios as well as standalone stations for electrocardiogram and radiology analysis. This book is an important preparatory tool crucial to the armamentarium of any candidate preparing for an ICM exam.

OSCEs for Intensive Care Medicine is a comprehensive revision resource for doctors preparing to take the Fellowship of the Faculty of Intensive Care Medicine (FFICM) and the European Diploma in Intensive Care Medicine (EDIC). Written by a team of practicing intensive care consultants with extensive experience running a successful FFCIM course, this book features over 100 practice questions organised into eight mock OSCE exams and is mapped to both the FFCIM and CoBaTrICE curricula. Reflecting the real exams, they are divided into stations on professionalism, data, resuscitation, and equipment, each of which are accompanied by further reading to ensure high-quality self-assessment. With hints and tips throughout to help candidates avoid common mistakes and misconceptions, this

Revision Notes in Intensive Care Medicine is a key resource for candidates preparing for postgraduate intensive care examinations. Mapped to the FFICM, EDIC and FCICM syllabuses, this title ensures candidates have all the information needed to prepare for their examinations. Information is presented in concise note form and bullet points with visually memorable tools, such as tables and diagrams, making revising and retaining key facts easier. Chapters are arranged into physiological systems, such as 'Respiratory Intensive Care' and 'Obstetric Intensive Care', and are subdivided into major clinical issues within each chapter so specific areas of further study can be found easily. Drawing from the authors' experiences as successful candidates, and carefully reviewed by consultants, Revision Notes in Intensive Care Medicine provides the foundation for postgraduate intensive care exam revision.

For 25 years *Anaesthesia, Intensive Care and Perioperative Medicine A-Z* has provided a comprehensive resource of the relevant aspects of pharmacology, physiology, anatomy, physics, statistics, medicine, surgery, general anaesthetic practice, intensive care, equipment, and the history of anaesthesia and intensive care. Originally prepared as essential reading for candidates for the Fellowship of the Royal College of Anaesthetists and similar exams, this fully updated edition will also prove as invaluable as ever for all anaesthetists and critical care physicians, as well as operating department practitioners and specialist nurses. The alphabetical arrangement with extensive cross-referencing ensures a full understanding of topics. The succinct and clear text and diagrams make for easy quick reference. The exam preparation checklist is ordered by key topics to facilitate effective revision. The contents are easily accessible with the accompanying ebook. There has been a substantial addition of new entries as well as revision of existing ones. This acknowledges the breadth of information needed to satisfy the range of activities performed by anaesthetic, intensive care, nursing and other colleagues, and also reflects the ever-changing field in which they all work. The consolidation of the role of anaesthetists as ‘perioperative physicians’ is reflected in additional entries of particular relevance and also by the enhanced title of the book. The structured ‘revision checklist’ of entries which is particularly useful to those preparing for examinations has been further developed for this edition.

an accompanying interactive DVD which contains a wealth of supplementary material including a procedures and equipment library, case based scenarios to aid recall of important facts and a summary of important critical care literature.
