Dream Baby Guide by Sheyne Rowley

A dream feed is a feeding that happens when your little one is asleep—usually between 10 PM and midnight. This last nursing or bottle feed is to “tank up the engine” so that your baby will sleep three to four hours longer, giving you the opportunity for some much-needed rest.

Dream Feeding - What Is It, How To Do It? | Sleep Advisor

Tracey Hogg, who first coined the term, defines dream feeding as feeding a young infant while he or she sleeps. To accomplish this, you gently hold your sleeping baby in a feeding position, and try to stimulate the rooting reflex by stroking your baby's mouth and offering your baby a breast or bottle.

Dream feeding: An evidence-based guide to helping babies ...

In adults, we're most likely to dream during rapid eye movement (REM) sleep, although dreams can happen during other sleep stages, too. This REM sleep may even start before birth: Brain waves that closely resemble those found in REM sleep have been measured inside the womb between 25 and 28 weeks.

Do babies dream? - Today's Parent - Pregnancy, baby ...

Baby sleep expert Jo Tantom says you can start to introduce a dream feed as early as two-weeks-old. Of course, if it doesn't suit you or your baby then don't do it; only do what's right for you. If you fancy giving dream feeding a go, here's how: When should you dream feed?
