### HP 3800 Switch Series - Hewlett Packard Enterprise

Complete the stack configuration of the high-priority switch, including the stack member ID, stack priority, stack domain ID, and stack port. After the configuration is completed, save the configuration and restart the switch. Disable stack ports of the high-priority switch. This operation prevents a failure to save the configuration and set up a stack because it prevents the low-priority switch from automatically restarting due to a stack merge during the configuration.
