Industrial Safety Environment

Industrial environments are usually more harsh than normal work environments, such as an office. In an industrial environment, people and equipment are exposed to more extreme conditions. Depending on the job, these conditions can be very severe. Most industrial environments are warehouses, plants, manufacturing or fabrication facilities. These industrial environments often lack advanced heating and cooling controls (HVAC), and are sometimes partially exposed to the elements.

Industrial Environments, About Industrial Environments

Industrial facilities have unique safety challenges because hazards and incidents affect more than just the people on the factory floor. A fire in the workplace, missed days due to injury, or chemical hazards can affect your production output, which can delay shipping schedules, fulfillment, vendor relationships, and customer satisfaction.
