To prevent food poisoning and contamination, make sure they uphold good personal hygiene, for example, keeping personal items (mobile phones, keys, wallets) away from the food, wearing protective clothing, covering any wounds like papercuts or scabs, tying back hair, keeping nails short and free from nail polish (as it may chip and fall into ...

Hygiene Practices for if Your Factory Handles Food

Hygiene is a series of practices performed to preserve health. According to the World Health Organization (WHO), "Hygiene refers to conditions and practices that help to maintain health and prevent the spread of diseases." Personal hygiene refers to maintaining the body's cleanliness.. Many people equate hygiene with 'cleanliness,' but hygiene is a broad term.

Hygiene - Wikipedia

Meats must be stored and cooked properly as part of proper food hygiene. Many people use containers that are especially designed for use in a freezer to preserve raw meats for later use. Freezing helps slow the process of decay, thus minimizing the chances for food poisoning when the meat is used later.
