Studio - Modular Timber Frame Homes

The Craft Of Timber Framing. Timber framing is just the kind of traditional craft that we at Hearthstone specialize in. Meticulously practiced for centuries as the preferred method of building construction, the trade and tradition nearly died in the early 1900's as steel mills, high-production saw mills, wire nails, and mass production psychology replaced the art and craft of timber framing ...

Timber Frame Homes by Hearthstone Homes

TFEC 1-2010 Standard for Design of Timber Frame Structures and Commentary. 1.02 Responsibility for Design . When the owner engages an Architect and/or Structural Engineer of Record (SER) to design the project, the Timber Frame Contractor (TFC) shall not be responsible for the suitability, adequacy or Building Code conformance of the design.

Code of Standard Practice for Timber Frame Structures

Jettying (jetty, jutty, getee (obsolete) from Old French getee, jette) is a building technique used in medieval timber-frame buildings in which an upper floor projects beyond the dimensions of the floor below. This has the advantage of increasing the available space in the building without obstructing the street. Jettied floors are also termed jetties. ...

Come 2021, it appears the city will be home to the tallest timber-frame building in the U.S. - the 10-story office tower planned for the \$175 million Market Square project in Ohio City.

Ohio City could score tallest timber frame building in U.S ...

A crown post is a term in traditional timber framing for a post in roof framing which stands on a tie beam or collar beam and supports a collar plate. Historically, crown posts were called king posts, but this usage is confusing and obsolete. A crown post is designed to be in a compression and transfers weight to the tie beam, where a king post is designed to be in tension and supports the tie ...
