To re-pot your orchid, follow these steps: Remove it from the plastic pot and carefully remove as much of the moss as you can. Healthy roots should be white and... Cut away any shriveled, rotten or blackened roots. Viktoriya Stoeva / The Spruce Set the plant into the pot and fill in around it with ...

### How to Grow Orchids Indoors - The Spruce

Airflow is probably more of an issue when you've gotten many orchids, especially if they are growing in a crowded space. Airflow should be very light, but present. Stagnant air can benefit bugs in the crevices of your orchids. Keep in mind, though, that airflow will also dry out your orchid quicker.

### Top Ten Orchid Growing Tips | Oregon Orchid Society

Caring for Orchids. A west or lightly shaded south window is best for growing most orchids. As a general guideline you can water your orchids with a thorough soaking once a week. Keep the humidity high by misting your plants once a day or put them on orchid growing humidity trays. Most Orchid plants will grow well in the temperatures of your home, but they do prefer to cool down at night to 55 - 60 degrees and they do need a period of darkness, so don't leave any nearby lights on at night.

### Orchid Care Tips for Growing Healthy Orchids

Vanda, Vanilla and Phalaenopsis are examples of orchid species that are monopodial in their growth patterns. Sympodial growth, on the other hand, is one in which the orchid plant grows horizontally. In this case, a common rhizomatous base produces engorged stems known as pseudobulbs from which leaves, in turn, grow out of.

### Growing Orchids from Seed- 10 Tips for Success - Planted Shack

Orchid Growing Tips. Most orchids require moist, well-draining conditions. There are several types of growing media that can be used with orchid plants—redwood or fir bark, sphagnum peat moss, rocks, cork, charcoal, sand, potting soil, etc. A basic mix for growing orchids consists of coarse perlite, fir bark, and sphagnum moss. You can also add charcoal but this is optional.

### Indoor Orchid Care - How Do I Take Care Of An Orchid Flower?

The most common cause of death for orchids (and most houseplants) is usually overwatering. Instead of watering your plants on a strict schedule (every other day, or once a week, for example), pay attention to your orchid's needs and how much water it uses.

### How to Care for Orchids | Better Homes & Gardens

Different genera of orchids have different ideal humidities, growing temperatures, watering schedules, and light requirements. Talk with your local nursery or visit the local chapter of your orchid society to find out what makes your genus of orchid grow best. 2 Choose the right kind of soil for your orchids.
